

Dear Elon,

We all know how you have been the pioneer in the field of autonomous vehicle and electric car industry that not only focuses on saving the planet but also on the quality and accuracy of their products. we team Abhiyaan is an enthusiastic group of multidisciplinary students of IIT Madras intelligent robust precise and safe ground navigation systems the team comprising 45 members is based in center of innovation CFI IIT Madras which provides a platform for creative ideas to be realized into groundbreaking product prototypes and revolutionary business models with mentoring from the industry faculty and belemnite we all know about Tesla founded in 2003 by a group of engineers who wanted to prove that people did not need to compromise to drive electric that electric vehicles can be better quicker and more fun to drive than gasoline cars we all know that today Tesla builds not only all literary vehicles but also infinitely scalable clean energy generation and storage products.

Team Abhiyaan has always looked at Tesla Motors as inspiration , the way your company has changed the way to drive without harming the environment by developing strong AI based autonomous vehicles .

Looking at the booming industry of autonomous electric vehicles don't you think it's a high time to invest in the Indian

Market . Thus, it would be a great opportunity for us to sponser your company preferably the high Tech Tesla cars , here in India . We have a great PR team and Alumni network globally.

Not only that , we Have participated in many global events like the 2019 intelligent ground vehicle challenge Michigan USA where we ranked second over all for the grand lesco trophy not only that in the 2018 intelligent ground vehicle challenge Michigan USA V rank 10th overall.In the India autonomous challenge for 2021 we have been applauded as exceptional performance in round one and we qualified for round two which is currently in progress in 2017 for the intelligent ground vehicle challenge Michigan USA we ranked 13th overall.

These are just mere achievements we Have miles to go because India is one of the largest consumers of fossil fuels and we want that tag to be removed from it by converting the Indian motor industry into autonomous electric vehicles industry. And our this dream can only be achieved if a company like Tesla Motors collaborates with us.

With regards

(CFI HEAD)
